Eyal Artsiely
RCLE Mechanical Innovations

Re: Letter of Admiration

To Whom It May Concern,

I have known Eyal Artsiely for over ten years, due to my work in writing patents for various companies that have employed the talents of Eyal. These companies include Mul-T-Lock Technologies Ltd. and Rav Bariach Security Products, for whom Eyal invented many patents.

I myself am a mechanical engineer and it is rare to see someone with the mechanical insight and ingenuity that Eyal is blessed with. Eyal has solved many complicated mechanical problems of demanding functionality within given constraints of available space and time with elegantly simple and reliable solutions.

Eyal also invented a mechanism for a rifle that shoots around corners, for which I wrote the patents, and which has enjoyed much commercial and military success.

Best regards,

A handwritten signature in black ink that reads "David Klein".
